---

## Summary

I'm a passionate developer with expertise in React and Python, dedicated to crafting innovative and user-centric applications. I thrive on tackling complex problems with creative solutions and enjoy enhancing user experiences through intuitive design. Actively seeking new opportunities to contribute to exciting projects and collaborate with talented professionals.

---

## Employment

### SkyWater Technology - Expeditor (Jun 2022- Aug 2023)

- Helped improve the production workflow for semiconductor chips at SkyWater Technology. Collaborated closely with cross-functional teams to help streamline and identify bottlenecks in the production workflow. Jun 2022-Aug 2023
- 

## Projects

### Custom Excel Integration

A web application designed to streamline the process of integrating and manipulating data from Excel files. It allows users to upload Excel spreadsheets, perform data transformations, and export the processed data back into Excel or other formats as needed.

### Wordle Recreation

Developed a fully interactive Wordle game using Python and the Pygame library. This project involves creating a graphical user interface where players can guess a hidden word within a limited number of attempts.

### Frontend Web Portfolio

A showcase of my web development projects and skills, built using modern web technologies and best practices in responsive design."

---

## Skills

Python, TypeScript, JavaScript, SQL, Tailwind CSS, HTML, CSS

---

## Education

### Biochemistry

University of Minnesota Duluth • Duluth, MN  
05/2022

### Back End, SQL, and DevOps with Python

Nucamp
